# Information Security Overview

**Commitment to information security**

**Stixia s.r.o.** is an engineering and consulting company focused on software and cloud-based solutions. Information security is a core element of our services and business relationships.

We have implemented an **Information Security Management System (ISMS)** aligned with **ISO/IEC 27001**.

---

**Core principles**

- **Confidentiality** – information is accessible only to authorized persons,

- **Integrity** – information is protected against unauthorized alteration,

- **Availability** – information is available when required.

---

**Organizational and technical measures**

We apply appropriate measures to protect information, including:

- access control management,

- secure communication (e.g. encrypted data transmission),

- regular data backups,

- risk management and continual improvement,

- supplier selection and management with information security in mind.

---

**Incident management**

Security incidents are handled in accordance with internal procedures to minimize impact and prevent recurrence.

Security issues can be reported to:
**security@stixia.sk**

**ISMS scope**

The scope of the Information Security Management System covers:

**"Development, operation, and support of software and cloud-based software platforms for offshore wind energy, including related information assets, infrastructure, and support processes."**
